Note:
Marble, Limestone and Granite
Marble, limestone and granite are natural stone materials containing veins with tonality differences. There will be colour and markings caused by their complex mineral composition and incorporated impurities. While such material can be pre-selected before installation, this non-conformity in the marble, limestone or granite, as well as non-uniformity between pieces cannot be totally avoided. Granite tiles are pre-polished before laying and care has been taken for their installation. However granite, being a much harder material than marble cannot be re-polished after installation. Hence, some differences may be felt at the joints. Subject to Clause 14.3, the tonality and pattern of the marble, limestone or granite selected and installed shall be subject to availability.

Timber
Timber is a natural material containing grain/vein and tonal differences. Thus, it is not possible to achieve total consistency of colour and grain in its selection and installation.
